

"The  
phone  
that  
talks"

# This Telephone Talks

¶ This is the Telephone Age.

¶ Nearly half of the world's business is transacted over the telephone. Imagine what that means *in the saving of time*. But you must have a *telephone that talks*.

¶ The telephone in the home is no longer a luxury--it is a real necessity. For shopping, for "calling", for emergencies--for protection the telephone is indispensable. But you must have a *telephone that talks*.

## Our New Harmonic Party Line System

is the only satisfactory party line system to date. It is now working in perfect order. This system is absolutely selective and calls one party at a time. It provides a full metallic circuit, the same as an individual line, and enables you to hear the conversation perfectly.

May we tell you more about it?
